PROFESSIONAL SUMMARY

Final year B.Tech CSE student at Lloyd Institute of Engineering and Technology, Full-stack developer with real industry experience at **TradeIndia (Infocom Network Pvt. Ltd.)**, where I work on backend systems, multiple high-performance backend APIs for an SFA platform, accounts workflows, and production-grade features. Strong technical foundation in React.js, MERN, Django, C++, DSA, and OOP, with a track record of delivering reliable, efficient code (90%+ accuracy and 50% faster development). Passionate about scalable system design, clean architectures, and solving real business problems through technology.

EDUCATION

- | | |
|---|------------------|
| • Bachelor of Technology in CSE (8 CGPA)
Dr. A. P. J. Abdul Kalam Technical University, Lucknow | 2022-2026 |
| • Intermediate (81 %) - Rais Ahmed Inter College, Itwa | 2019-2021 |
| • High School (81 %) - Rais Ahmed Inter College, Itwa | 2017-2019 |

SKILLS

- **Programming Languages:** Advanced in C/C++, JavaScript, C#, Python, Java, SQL
- **Web Technologies:** HTML, CSS, Tailwind CSS, React.js, EJS, Bootstrap, AJAX, jQuery, JSON
- **Backend Technologies:** Node.js, Express.js, Django, FastAPI, Perl (CGI, Mojolicious, Mason), RESTful APIs, DBI/DBD::Pg, .NET
- **Mobile App Development:** Kotlin with Android Studio, Jetpack Compose, Firebase SDK
- **Cloud & DevOps:** IAM AWS (EC2, S3, Lambda basics), CI/CD pipelines (Github Actions), Azure, Docker, Kubernetes, Jenkins
- **Databases:** PostgreSQL, Query Optimization, Dynamic SQL, MySQL, MongoDB, pSQL, Database Design, Firebase Realtime Database
- **Tools & IDEs:** Git, GitHub, VS Code, PyCharm, IntelliJ, Android Studio, Arduino IDE, Figma, MS Office, libreoffice, SharePoint, Jira, Bitbucket, Postman, Thunder Client, Vim
- **Soft Skills:** Communication, Teamwork, Time Management, Adaptability, Brainstorming
- **Languages:** Hindi, English, *German (beginner)*

EXPERIENCE

Junior Software Developer

TradeIndia (Infocom Network Private Limited), Sec-137 Noida

Aug- 2025 to Present

Key Responsibilities & Achievements:

- Working in a large-scale B2B e-commerce environment, gaining hands-on experience with real-world production systems and backend workflows.
- Successfully completed full **knowledge transfer (KT)** for the Accounts & Taxation backend module, including understanding invoice workflows, credit notes, and tax calculation logic.
- Studied the Accounts database architecture and backend logic, and prepared a complete **Data Flow Diagram (DFD)** representing the entire transaction workflow and system interactions.
- Over past 4 months, gained practical experience in production-level backend development
- Implemented the **Credit Note Tax Invoicing module** and delivered my first production merge to the main branch.
- Appreciated by the Team Lead and Manager for the quality of **EMI Report Dashboard** work, accuracy, and timely delivery.
- Actively contributing to debugging, enhancing backend features, and ensuring smooth integration with existing systems.
- Strengthened skills in **backend development**, production-level problem-solving, and collaborative teamwork in an agile environment.

1. Lead Count Notification API (HL / SHL Dashboard Metrics)

- Designed and developed a high-performance REST-style API to dynamically fetch and display lead category counts (High Performing Leads, Hot Leads, Super Hot Leads, Non Hot Leads, New Registrations, GST Verified Leads) in the SFA application.
- Optimized database queries using **PostgreSQL COUNT(*) FILTER aggregation** to replace multiple queries with a single efficient query, significantly reducing database load.
- Implemented secure parameterized SQL using **Perl DBI (DBD::Pg)** with dynamic filters (date range, user, branch).
- Integrated API with frontend using **AJAX (jQuery)** to update UI components in real time without page reloads.
- Ensured clean JSON responses using Mason handlers and standardized response utilities.

Technologies: Perl (Mason), PostgreSQL, DBI/DBD::Pg, AJAX, jQuery, JSON

2. Mini KYC Details API for Profile Page (SFA App)

- Developed a backend API to retrieve and display **Mini KYC information** on the SFA profile page, ensuring consistency with the Housekeeping Sales Lead List module.
- Reused and integrated existing business logic to maintain uniform labels, icons, and KYC status rules across

- platforms.
- Implemented a **display-only JSON API** for seamless frontend rendering without allowing data modification.
- Tested API extensively using **Postman** to validate response structure and data accuracy.
- Technologies:** Perl (Mason), PostgreSQL, JSON APIs, Postman
- 3. Nearby Sellers API with Location-Based Filtering**
- Designed and implemented a scalable API to fetch nearby sellers based on **pin code, city, and state filters** for the SFA application.
- Built dynamic SQL queries to support conditional filtering and pagination for optimized data retrieval.
- Implemented category-matching logic to return sellers dealing in the same product categories as the requesting profile.
- Added validation and logging using **custom logging utilities (sfa_logger)** to ensure request integrity and traceability.
- Developed end-to-end flow to:
 - Identify seller categories of a profile
 - Fetch geographic details (city, state, pincode)
 - Retrieve relevant nearby sellers
- Returned structured JSON responses for frontend integration.
- Technologies:** Perl (Mason), PostgreSQL, Dynamic SQL, JSON APIs, Logging Framework, Postman

PROJECTS

- Smart Home Automation System using ESP8266 and Android App:** **July 2025**
 - Designed a smart home automation system enabling remote control of electrical appliances (bulbs, fans, motor etc.) via Wi-Fi through a custom Android mobile app.
 - Configured ESP8266 NodeMCU to process REST API commands using Django backend, with sync via Firebase.
 - Delivered user interaction using Jetpack Compose (Kotlin), ensuring efficient device control.
 - Software Tech Stacks:** Jetpack Compose (Kotlin), REST APIs, Firebase, Arduino IDE, HTTP Client.
 - Hardware Tech Stacks:** ESP8266 MCU, Relay Module, Bulb, Breadboard, Jumper Wires, Power Adapter.
- MyBlog : New Technology and Innovation Blog:** **May 2025**
 - Developed a responsive blogging platform with user authentication and CRUD operations for blog posts.
 - Implemented RESTful API endpoints for seamless data retrieval and manipulation.
 - Used MySQL with SQL queries to manage efficient data storage and retrieval.
 - Tech Stacks:** EJS, CSS, JavaScript, Node.js, Express.js, SQL.
- MultiRoleShop - Multi-Role E-Commerce Platform:** **Nov 2025**
 - Built a Django-based e-commerce platform with multi-role support (Users, Vendors, Admins) featuring OTP authentication, product approval workflows, shopping cart, Razorpay secure online payments, role-based dashboards, secure transactions, product search/filtering, and analytics.
 - Implemented user management, product listing, password reset, and responsive UI.
 - Tech Stacks:** Django, SQLite, HTML, CSS, JavaScript, Tailwind CSS, Razorpay API, SMTP, Pillow.

CODING PROFILES

- GitHub:** <https://github.com/rroyalpradeep>
- LeetCode:** leetcode.com/u/pradeep884/
- HackerRank:** hackerrank.com/pradeepsonioffi1
- CodeChef:** codechef.com/users/pradeep_soni
- Codolio:** codolio.com/profile/rroyalpradeep

CERTIFICATIONS

- 1st Runner up **CODE – QUEST** Hackathon, Lloyd Institute of Engineering and Technology (2023)
- Pitch Cypher** – Lloyd Institute of Engineering and Technology (2024)
- Policy Workshop** – Niti: The Policy Lab, Kirori Mal College, University of Delhi (2025)
- 3rd Runner-up** – HashHacks 7.0, Cluster of Innovation, University of Delhi (2025)
- Data Structures & Algorithms** in C/C++ (2024)

ACHIEVEMENTS/AWARDS

- Earned recognition for securing **four offer letters** from different companies during campus placements — awarded for outstanding performance and multi-company selection **July 2025**
- Completed 300+ problems on LeetCode with 5 Badges
- Secured 1st Runner-up position in Coding Competition – LIET **Dec 2023**
- International Conference Volunteer – LIET **Feb 2024**
